That was when Touma heard my pleas.
Then Isis showed up, and helped both of us.
I wanted someone to save me.
I was always in torment.
Seeing all the deaths that were caused by me...
I was always saddened by them.

Despite this, the kind Touma ended up giving Isis
a lot of painful and rough memories.
We also caused the people around us a lot of trouble.

Tsuma!
It's me, Lily!
Answer me, Silver Cross!
Your reactor plug, Strosek the 4th, is right here!

Stop, Silver Cross!
Come here, Touma.
Touma ...

TOUMA!

Yes, it's me!
Lily...?

I'm sorry, Touma,
but I've finally remembered.
The person I was waiting for isn't someone that saves me,
but my Driver,
the holder of a "Strosek", the control plug for the Silver Cross.

I'm sorry for pulling you into such an unfortunate fate,
but I do not want you to be hurt any more than this
Lily...
You're not going to die. Neither will you be killing anyone.
Even if it's only one time, Trust me.
I'll definitely find a way to save you!

TOUMA!?
You all right?!
I...sis...?
Great! You recognise me!
Are you fine? Where's Lily gone?
I'm not sure, but...
She's inside me right now.
She saved me.

You went a bit over-board, miss black hair.
You didn't have to light the smoke-screen on fire...

It appears that there is one person in need.
Although I can't see the other girl, Lily.

Yes.
Status update? Has the battle ended?
Is there a need for emergency aid?

Proceeding to aid the two of them, and to do an on-site check.

HQ Medic team, reporting.
Please stand by, Swordfish 1.
We will carry out aid.
Rescue and care of the wounded is a job for the medical team.
Great job, you three.

Our specialized medical team is trying our best in developing a treatment for the Eclipse Virus.
Touma's the first patient to have recovered from an Eclipse infection.

ぽんっ
Don't be so hasty, little girl.
WHAT?! YOU MEAN YOU'RE GOING TO USE HIM AS A HUMAN SUBJECT?!

Not to mention he's a treasured person of one of our aces.
Neither the TSAB or 9S6 would do something so cruel.
Please, don't act so nasty.
Would you accompany us voluntarily?
We'd also love to hear the story from you too.
"No, we really mean it. We'll be delighted if you would be a good girl and come", right?
You're just using that term to force me along.

Phew, what a trip.
You sure went on another long trip.
Thanks to that, I've managed to obtain a mountain of good-ies!
Thanks to the new navigation system for the ship, Stella's going to have a huge load lifted off her!
By the way, sis,
you sure it's okay, not finishing the special force's boss off?

Looks like you still don't know enough, Vey.
You could have done her in with a little push.
If I did her in, the Bureau's going to go out of their way to hunt us down.
She's quite famous in there, you know?
It'll be a pain if her acquaintances come in force to avenge her.
I guess that's why you left her hanging, instead of sending her off to the grave.

I reckon your way is the round-about one.
Now, don't say that.
It's not something to kill them over. That being said, our family's still small.
They just have to chase us, like they are now.
We'll just have to run from them, like we are now.
I wonder if both parties can fill their roles well.
After all, to achieve great things, we need the same amount of preparation.
Well, just leave the scheming to Fortis and I.
Roger.
Well, I'll leave it up to you, I'll just follow your orders.
Sure thing.
Oh, I just remembered something else.

You know the Poke we have?
I finally know where the real thing is.
The "tome and gun-blade pair"?
We had the replica divider.
That's right! It's related to our next job, so I'm thinking about starting from there.
We've gotta do a little branding
on the people who tricked us into doing such a half-assed job.

The "Raptor" is an automaton that moves upon receiving external commands.
It is possible to issue real-time commands.
The unit constantly sends it's monitoring data from its eye camera to the command centre.
Of course, it is possible to control multiple units, or have a team of people each controlling a unit.

With current technology, it is possible for the batteries to last up to 25 minutes with the unit running at maximum capacity.
The internal batteries allow for about 40 minutes of normal activity.
By attaching additional equipment, it is possible to extend the operational time or even give it additional weapons.
But our company is giving it all for the TSAB to officially adopt this technology.
There are still plenty of matters regarding the tuning of the OS, maintenance, the cost of parts, and other things.
It can truly be called the ultimate multipurpose weapon.

The operation to capture and arrest the members of the Huckebein ended in failure. Several members of Special Duty Section Six, including the captain, has suffered various wounds

The youth, Toume Avenir detected a call for help while exploring some ruins.
He searched for the source of the voice, and sneaked into a heavily-guarded facility and found the girl.
He was discovered by a staff member while rescuing the girl.

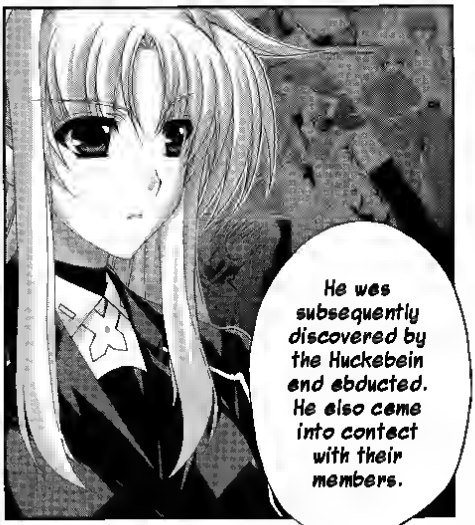
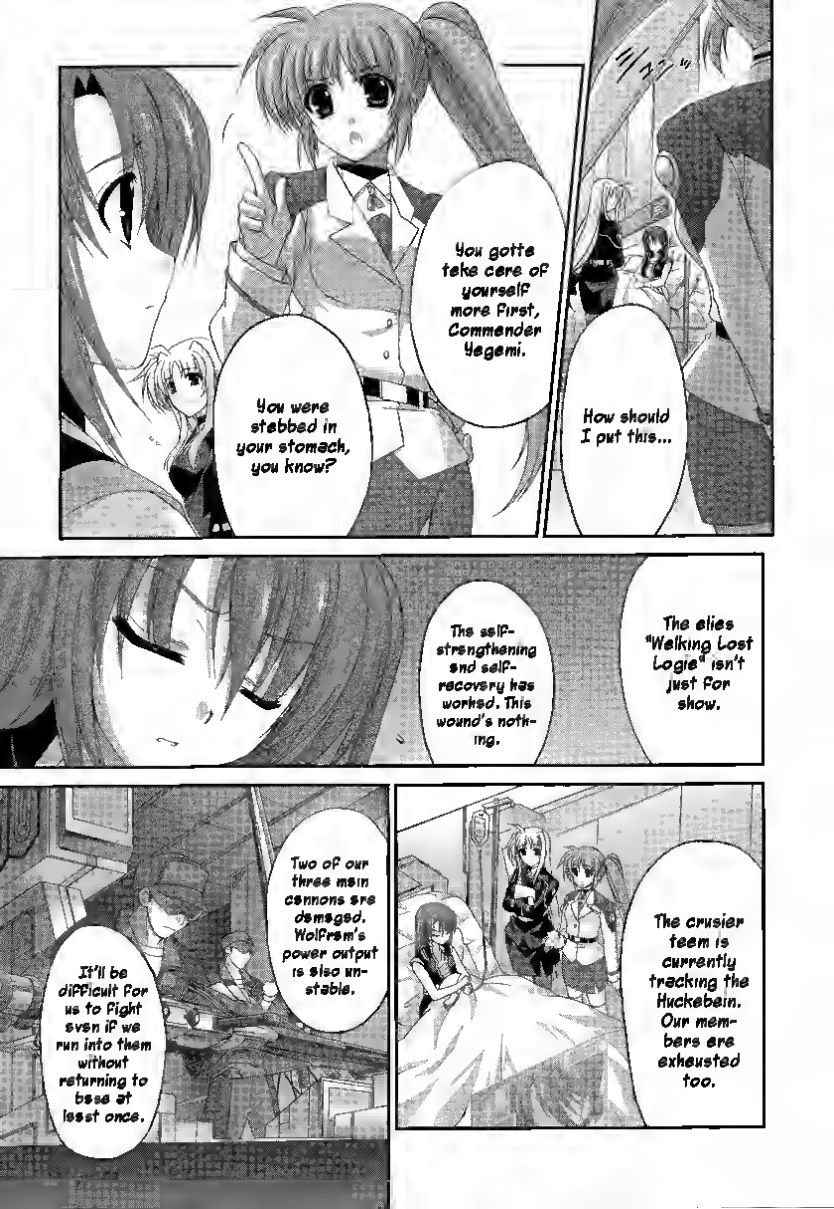
During that time, he learnt various facts, including the murderous and destructive impulses,
and the fact that he is a carrier of the Zero Gene.



I wish to meet him in person. Is he in a condition where he is able to have a conversation?
He is currently undergoing a medical check. His Eclipse symptoms has subsided, but it'll be a problem if a relapse occured.
I see. Tell me when things have settled for Touma.
I wish to know more about the Eclipse and the Huckebein, even if just a little.
Ah... But...
What is it?



How should I put this...
You gotta take care of yourself more first, Commander Yagami.
You were stabbed in your stomach, you know?
The alias "Walking Lost Logic" isn't just for show.
The self-strengthening and self-recovery has worked. This wound's nothing.
The cruiser team is currently tracking the Huckebein. Our members are exhausted too.
Two of our three main cannons are damaged. Wolfram's power output is also unstable.
It'll be difficult for us to fight even if we run into them without returning to base at least once.

Thank you very much.
It's Pine. It's just reporting our current situation.
En-Forcer, continue with the summary of your investigations
Ginga and the others will bring the backup Cannons, OGX and other equipment provided by CeledFwlch. Please check them, Captain Takemachi
We'll dock at Veiten's second port and resupply.
That being said... apologies for speaking out of line, commander.
Roger.
Affirmative.

Okay ...
Touma, try giving the command "react off".
Hmm, this should be okay.
React off.
Concentrate and imagine yourself stretching your palms and wrists open!
Yup! Just like that!

Oh my!

Reactor successfully terminated.
Progress of EC infection 7.5% - insufficient to cause level 2 symptoms.
Lily is just sleeping due to exhaustion and fatigue.
The results of the technicians and the medics were correct!
Yep! We were right!

Lily and you. Touma... a carrier of the Zero gene. and a Strosek.
We'll be able to close in on the secrets behind the Eclipse as long as the two of you are here.
And this child... the Toma of the Silver Cross.

That's enough, Silver Cross.
ELIMINATE- CRISIS-
.....
I've heard a lot about you and Mari from Su-chan.
I want your help to solve the mystary behind the Eclipse Virus, and to stop any further tragic events from occuring.
Touma, will you assist us from now on?

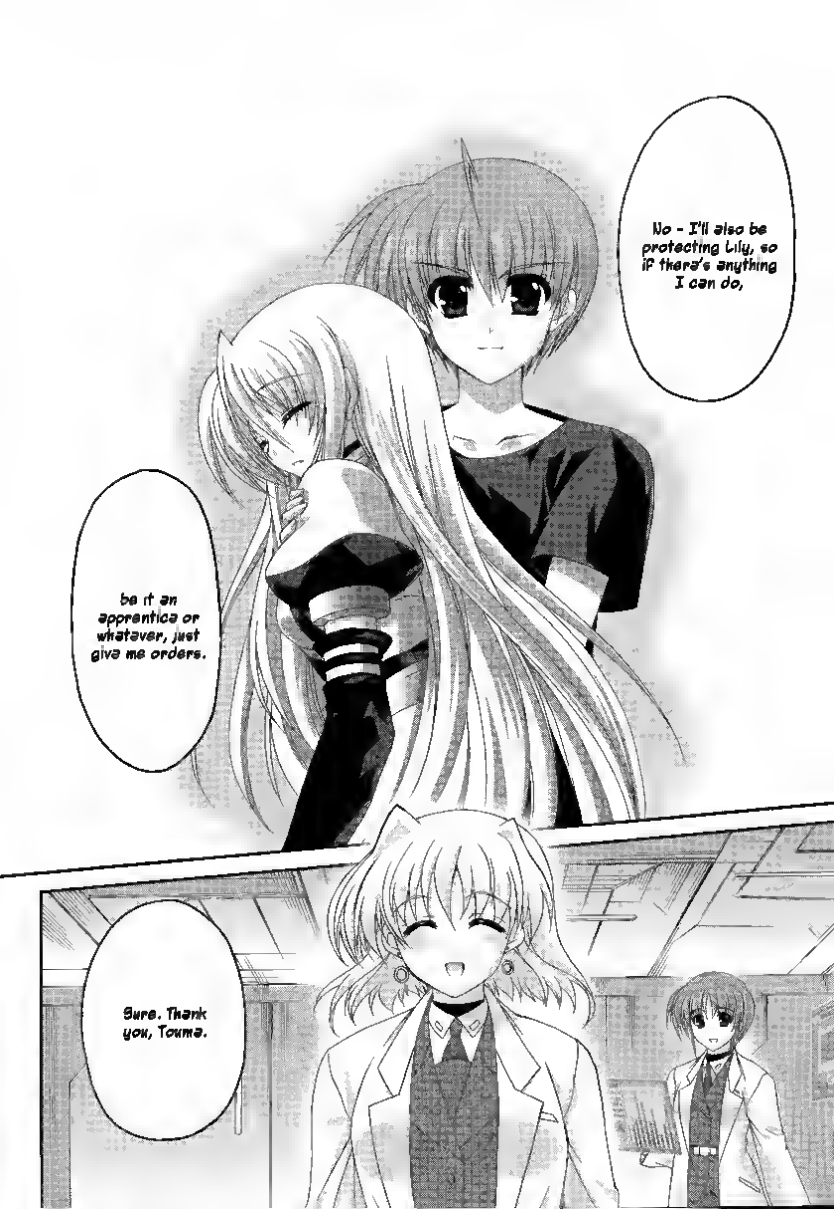
Of course I'll help. It's both Lily's and my wish.
...
I haven't been able to thank you for saving me yet as well... we feel more at ease with you around.
Isis.
It'll be troublesome, but do you mind sticking with us a little longer?

Not to mention I think that you're not the type to not see something through anyways.
Well, in any case, you've been put under our care.
We have contacted your family and received their permission.
EHH ?!
W-well, leaving the thanks aside, I'm been relied on, so I gotta do my best!
You've seen the Huckebein members faces and weapons, right?
They may come into contact with you again, so we contacted your family and told them we'll be protecting you for the time being.
Your father and brothers said "We want her to settle her own mishaps out of the house, so please feel free to use her".

Isn't Egret the company that guards important people? I've seen them on special TV programs...
I HID MY NAME BECAUSE I DIDN'T WANT YOU TO KNOW MY BACK-GROUND!
THAT'S RIGHT!

You're in charge of guarding Touma and Lily though-

You're under the protection of the Special Duty Section Six starting today.
Isis Egret, the youngest child, and oldest daughter of the Egret family, menegers of the Egret Security Services



No - I'll also be protecting Lily, so if there's anything I can do,
be it an apprentice or whatever, just give me orders.
Sure. Thank you, Touma.

I hope Lily wakes up soon.
Yeah ...
We are not yet able to know the relationship between a EC gene carrier and a reactor,
except that it's best if they weren't seperated.

Try to have Lily by your side as much as possible, Toume.
Of course
Our Ace went to great lengths to arrange this for you, Isis.
Ace... the person in the long white skirt?
It's not her, but Su-chan who placed you together.
"They really think of each other as friends, so please allow them to be together"
I'll definitely protect them two of them!
You're fine with me being with them too, right?
ALRIGHT! I'LL DO MY BEST! EVEN IF IT MEANS BEING AN APPRENTICE PUBLIC SERVANT OR SOME JOB LOW IN THE HIERARCHY!

I don't want to use these apprentices... they're still an unstable trio.

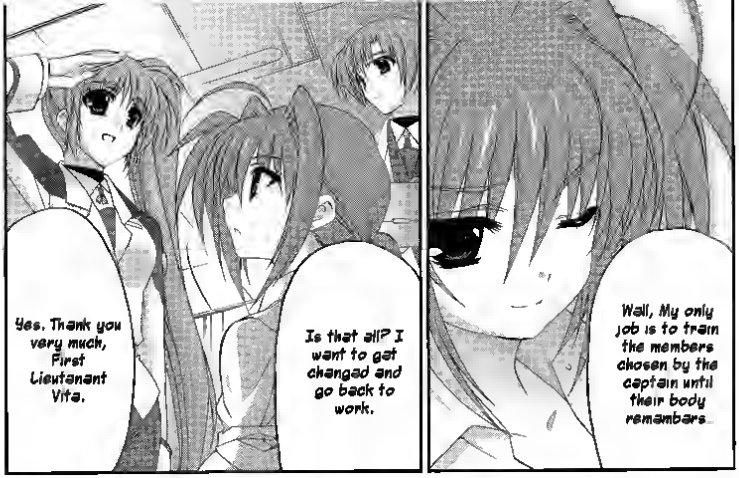
Well, that strength may be from the power of the Eclipse and Zero...
but he may be quite the diamond if we polish him enough.
The black haired girl, Isis, is also an aerial type. If Cinque and Wendy extends her skill on tactical explosives, she'll get even better.

Touma has potential to be an aerial swordsman or an artillary type. It's pretty interesting.

Lily's potential is still unknown, but I commend her courage for going out to Touma.

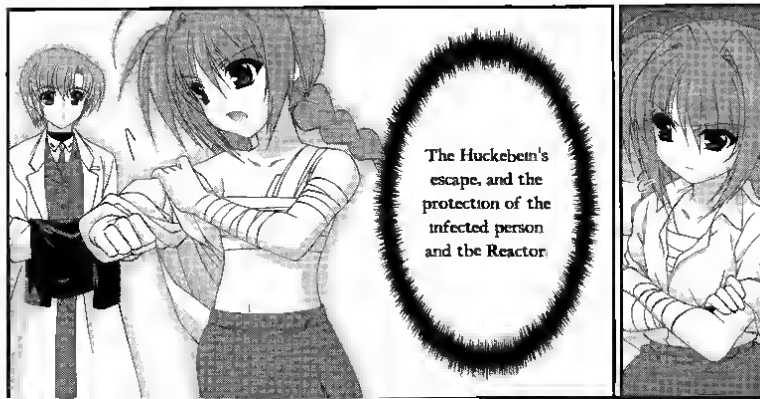
Could you please stop your eyes from sparkling so much at the mention of these potentially enjoyable trainees?
Have you considered the possibility of them being extremly hazardous?
All three of them seem to have great potential!
I want to raise them - they'll certainly become strong!
Won't they be the same if we left them alone?
Even if we were to restrain them, we'd need a fitting level of security and plans of response.
It'll be bad if they were recruited by crime syndicates while they were living normally.
The countermeasures we have against the Eclipse is headed by the Special Duty Section Six and its related organisations. It's not a case for others to meddle in.
I s'pose you're right.

No, No! "To Fight is To Take Some-thing Back", right?! It's the same thing this time too!
Here you ers with your sxsg-gere-tions sgain
Also, if worse comes to worse, it'll be easier to combat them if we knew how they fight.
Think about why we're magic users!
It's because we have the power to suppress, protect and save without hurting anyone.
I'm a Knight, so don't lump me together with those magicians.
EHH?
ぷぅ



Yes. Thank you very much, First Lieutenant Vita.
Is that all? I want to get changed and go back to work.
Well, My only job is to train the members chosen by the captain until their body remembers.

The same to you.
Don't overdo it!



The Huckebein's escape, and the protection of the infected person and the Reactor.

If we're to expect a perfect operation, we'll have to revise and rebuild our current measures, as well as strengthening our equipment,
but if we have to launch, we won't have that leisure.
From speaking with their skipper, and Touma, it seems possible that the "Tome and Gunblade" isn't from Huckebein.
As long as we cannot grasp tha situation, or know how to respond, we have no choice but to maintain in standby for rescue or an emergency launch.

The "Magician Killers", trembling the current world with their arms.
the Eclipse Virus, with neither its origins nor symptoms of infection fully understood.
As long as there is a chance, there could be a riot, or a collapse on a global level.

Ah, that reminds me!
'ERE WE GO!
I've totally forgotten, but I've got some things I picked up along with that Platty's bag.
I've finally remembered it.
I wonder if it's batteries are flat or something.

Seems so.
Isn't that thing Touma's?
THAT IS CORRECT. I AM A CONVENIENT NON-COMBAT TERMINAL USED FOR PHOTOGRAPHY AND INFORMATION RELAY.
IF YOU WOULDN'T MIND, JUST THROW ME OUT OF A WINDOW AND I'LL RETURN TO MY MASTERS SIDE.
TO
TO
TO
OO, MANY THANKS, MY LOVELY LASS.
However, I'll release you after we finish our next job. Stay here till then.
Hmm, I don't really want to do anything that will cause Touma to hate me, so I want to return you.

That's right. Administered World #16, Liberta.
YOUR NEXT... JOB?
We're paying a visit to the weapon developer, the Ventine Corporation.

The origins of the Eclipse Virus still remains unknown.
Shortly following infection, the virus modifies the host's body into that of a superhuman,
taking away their personality and human conscience, replacing it with impulses of homocide and destruction.
However, Reactors, who act as both the infector and the suppressor,

Hey, have you finished up over there?
Yeah. I've secured our retreat route.
Though there wasn't any point in our disguises,
We ended up doing our typical violent raid anyways.

I've terminated all alarms and alerts, so no one will notice anything for at least two hours.
Well, this place was ridiculously heavily guarded, so I could see why it happened.

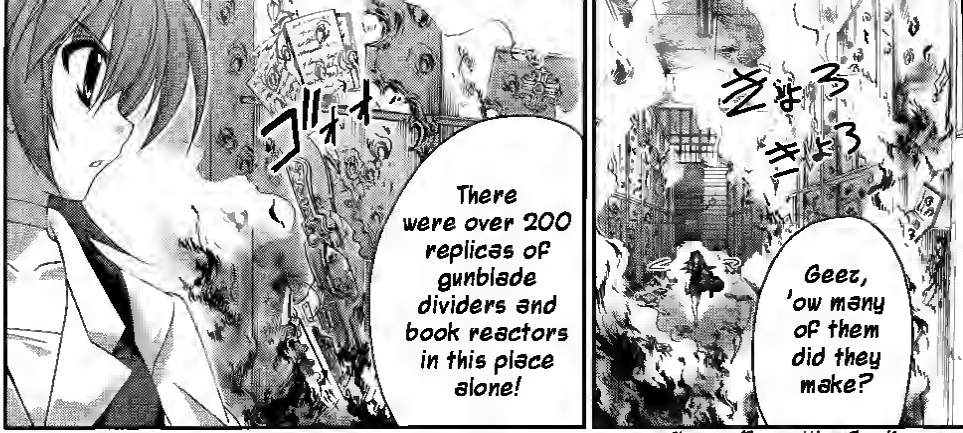
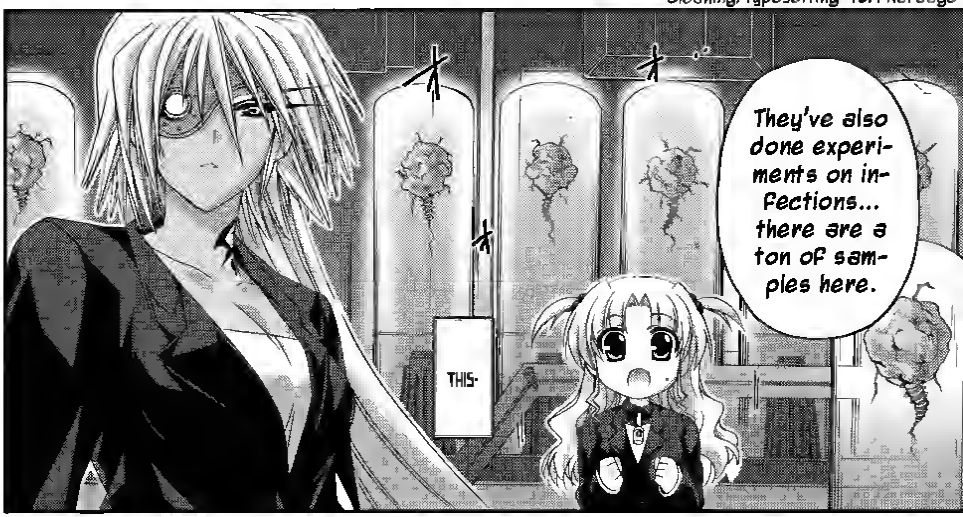
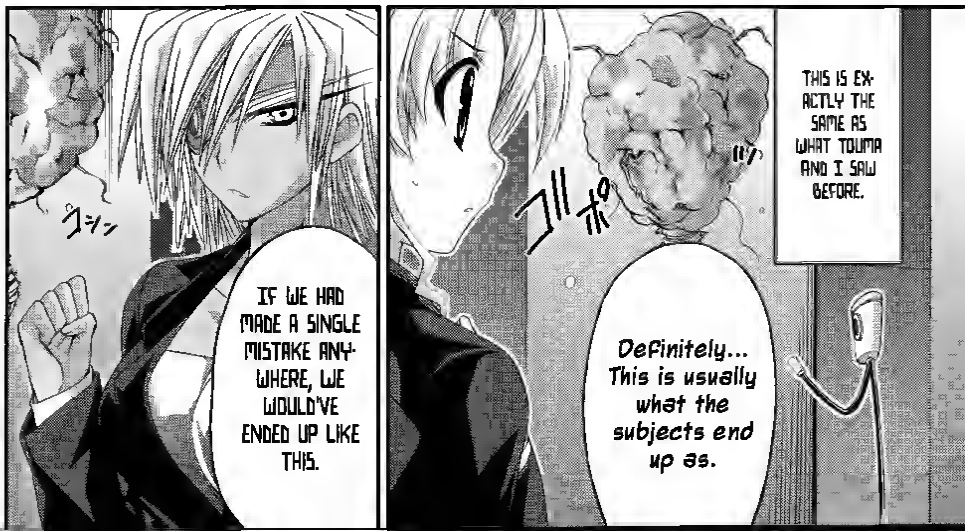
Arn. How goes the replica dividers?
Yo, Dealin' with it now!



There were over 200 replicas of gunblade dividers and book reactors in this place alone!
Geez, 'ow many of them did they make?

Cleaning/Typesetting: Tori Karaage





IF WE HAD MADE A SINGLE MISTAKE ANYWHERE, WE WOULD'VE ENDED UP LIKE THIS.
THIS IS EXACTLY THE SAME AS WHAT TOUMA AND I SAW BEFORE.
Definitely... This is usually what the subjects end up as.

The first question ...
チ
ャキ
I'm giving you five seconds.
Lying won't help you, so just spit it out.
キ
Leaving the manufacturing of the dividers and reactors aside-
What were you planning, deceiving us and giving us such bullshit jobs?
H-how could we-

The only clue he had on his search was the "Book and Gunblade duo".
The mining incident... didn't Touma mention that?
Yeah. The one when the mining town was obliterated, leaving only that brat alive.
オ オ オ
Touma sure has some pretty deep connections with us.
We shouldn't have let him to go back to the TSAB.
Sis and I fit that bill, but we never work together anyways, and I don't recall ever destroying mining towns.

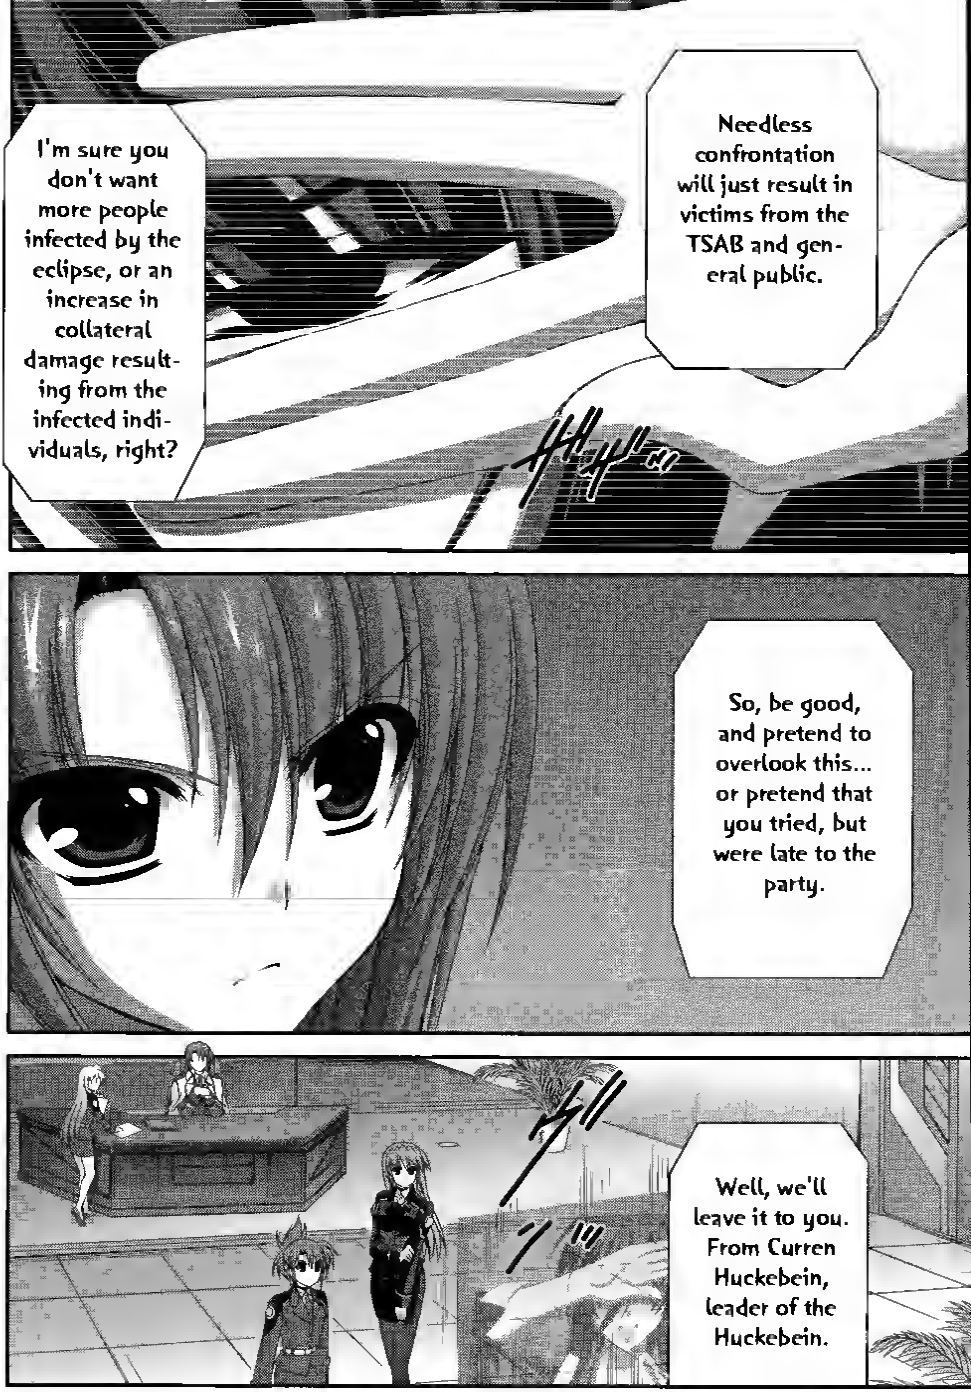
That duo and the organiza-tion behind them
is probably deeply involved in the EC plan.
I got the information on the locations of active replicas.
Okay, our interview is over!
Replicas? So there's more than one pair, after all.
Yep!

The trouble-some thing is that they are spreading out through different worlds.
There are currently four pairs that are active.
Even so, they are tricky opponents.
IF THEY DO, WE'LL JUST GIVE 'EM A GOOD BEATIN'!
I guess those special forces guys are gonna move out again once they find out about this raid-
How's this for an idea?

How about we assemble all the children and their relatives that are currently on their vacations?
It's a request from their dear leader! I'm sure they'll oblige happily!
Well, I'm not too unhappy with that.
So we're going to try and assemble all those annoying people, huh...

Special Section Six, Mid-childa Ground Barracks
The 4th Factory of the Vandein Corporation has been raided.
The official announcement states that the culpurit and their aims aren't known yet, but this has to have been carried out by the Huckebein.
And there's also this...

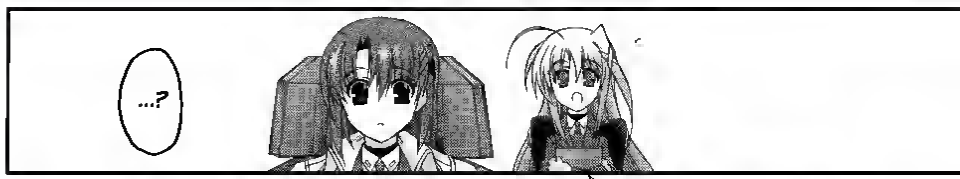
Hi! Nice people of the Bureau!
Let me give you some friendly advice! Don't come after us regarding this incident!
We're just dealing with the evil people putting on the masks of good people.
We're widely seen as a crime syndicate, but we're actually actually trying to right the world, the way we see it



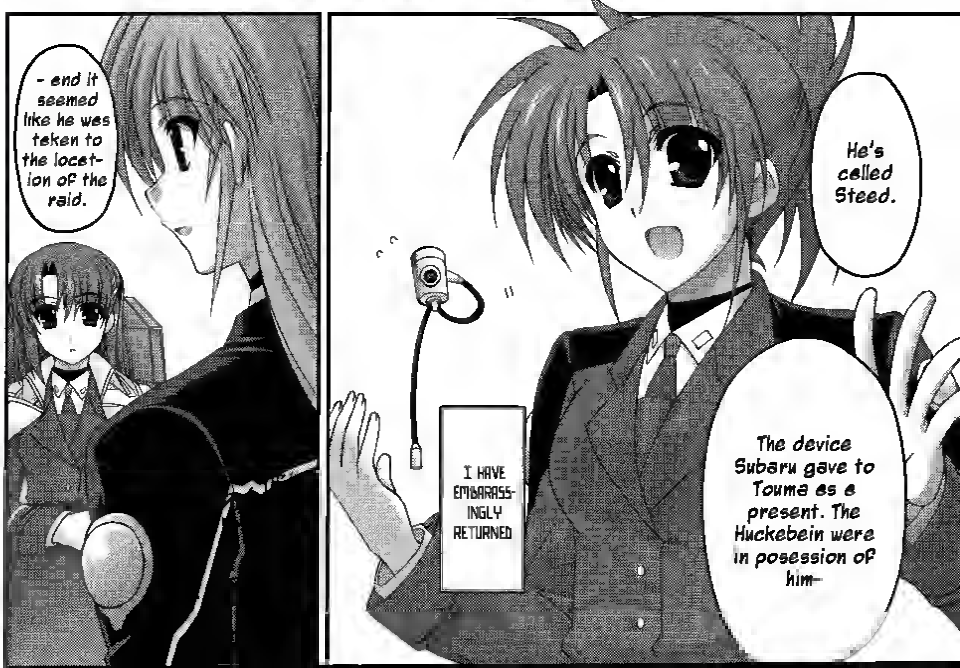
I'm sure you don't want more people infected by the eclipse, or an increase in collateral damage resulting from the infected individuals, right?
Needless confrontation will just result in victims from the TSAB and general public.
So, be good, and pretend to overlook this... or pretend that you tried, but were late to the party.
Well, we'll leave it to you. From Curren Huckebein, leader of the Huckebein.

-we received this recording.
... I see.
They only sent it to our section, and the main branch.
Fortunately, this has not been disclosed to the public yet.
Also... Wendi.
Oh, yeah!
That Huckebein bunch has sent us something that belongs to Touma...

UMM... GOOD DAY TO YOU

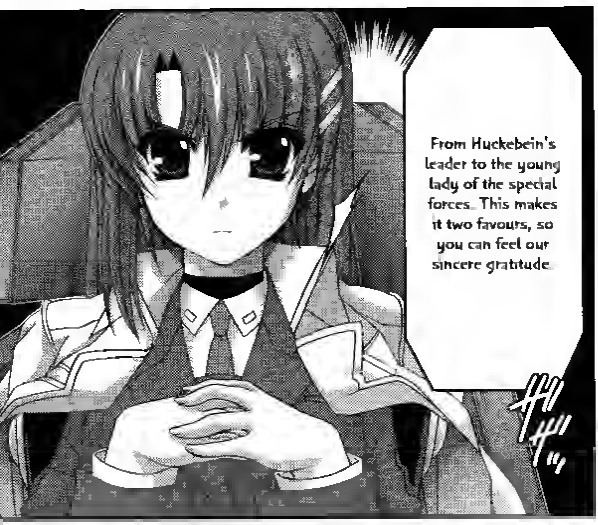


...?

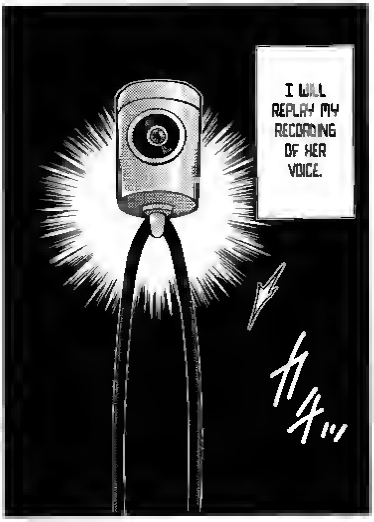


- and it seemed like he was taken to the location of the raid.
He's called Steed.
The device Subaru gave to Touma as a present. The Huckebein were in posession of him-
I HAVE EMBARASSINGLY RETURNED

YES...
Moreover, the Huckebein has a message for us, right?



From Huckebein's leader to the young lady of the special forces. This makes it two favours, so you can feel our sincere gratitude.



I WILL REPLAY MY RECORDING OF HER VOICE.

.....

ENFORCER LANSTER, SUPPORT OFFICER WENDI, AND THE TWO OF YOU.
I see.
Has anyone else heard this?
The First one aside, I can't just accept the second favour she pushed onto us.

I'm out of action right now due to my wounds
so I might as well cause some uproar in the meeting rooms while my wounds heal. Continue with your investigations in the meanwhile.
Roger.
Enforcer Lanster, send this recording to the investigation firm of the main branch, and the main branch of the special forces.
There will be delibrations and investigations about our "favour", but
YES?
Also, I want you to accompany me, Steed, but-
Thanks for the report, you two. You may go now.
NOT YET.
Have you seen Touma yet?
Then go to him, until I need you again.
Yes Ma'am!

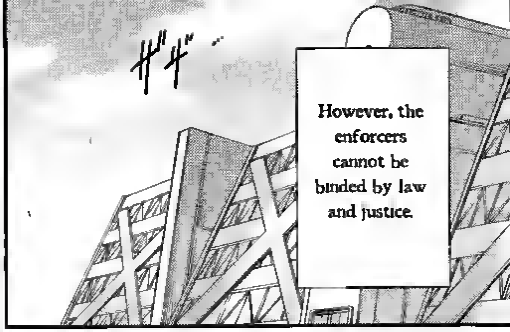
If we publicize the fact the special forces had secret "favours" exchanged with the crime syndicates,
The captain will be in a tricky position, even if it was a lie.
So... what was that about?
コツ
コツ
It won't be weird to find it strange that one could survive from being stabbed from the back, followed by the retreat of the enemy leader.
Even the first favour-
That's right, to not want to owe favours to crime syndicates means
Hmm? Then why did our captain say it herself?
I get it now.
Not only will we be fighting the Huckebein and the Eclipse, we'll have to be subjected to supervision and inspections.
If this caused a big issue, then trying to explain it all will be too tedious.

She wishes to continue commanding her troops through the correct means, without having to hide anything.
that she must have a lot of confidence.

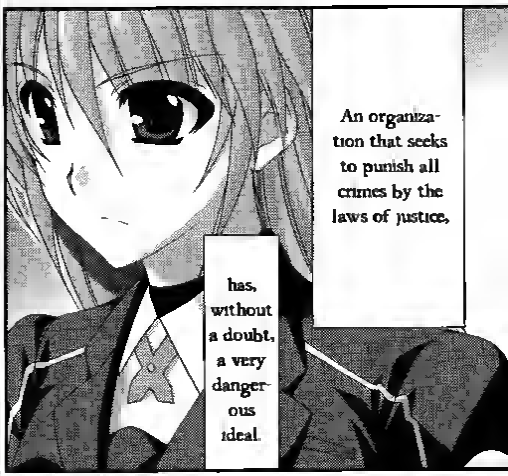
You're right.
I'm really respecting our lil' racoon of a captain now!
Don't you think it's quite a bother for us, the allies of justice to go through all those procedures?

That's right.
To say the truth, enforcement of the law is a complicated and tedious process.
たぬーっ
It's rude, and you'll offend me.
Also, don't address her by that weird nickname.
Roger that!

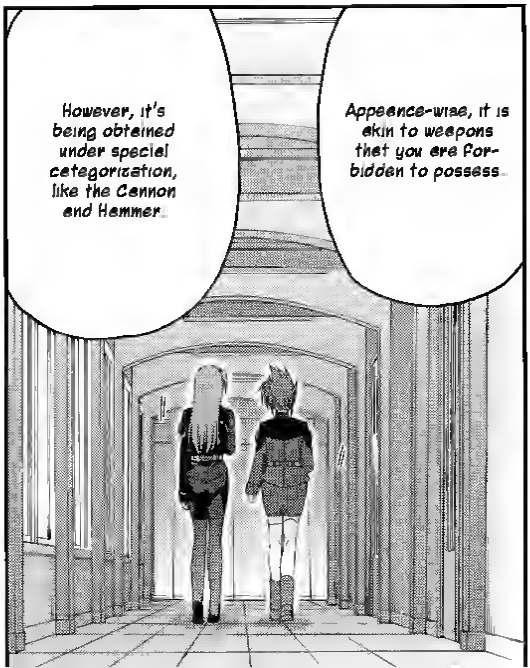
As a result of creating such hopeful organizations,
there have been many countries, and worlds that weaved a history of tyranny and oppression.



However, the enforcers cannot be binded by law and justice.



An organization that seeks to punish all crimes by the laws of justice,
has, without a doubt, a very dangerous ideal.



However, it's being obtained under special categorization, like the Cannon and Hammer.
Appearance-wise, it is akin to weapons that you are forbidden to possess.

Oh, by the way, when will your new equipment be done, Tia?
Next week.
It's pretty close to being actual arms, so inspection has been extremely tight.

Aah, it's Toume, Suberu and the others!
Even when we're walking on the edge of a fine line,
That's right.
Well, normal equipment can't do a single thing against opponents that are Mage Killers.
This is why we must have the inspections pass somehow.
we must continue to protect the lives and peace of our citizens.

The value of the lives we have met and saved
acts as a beacon that lights the path we tread.
Nove's here too, huh?
Yeah.

おお!
おお
STEED! WOAH! YOU RETURNED!!
SORRY FOR CAUSING YOU TO WORRY
おお
おお
YES. IT'S ALL THANKS TO YOU.

I am, Steed.
I SEE YOU'RE DOING FINE THERE TOO, ULY.

Ah, sure.
Sure. I'll bring her here next time.
Thank you, Nove.
Good to see you make some friends too!
I'm relieved to see you safe.

Is Vivio your friend?
She's Nanoha's daughter.
Shes two years younger than me, and goes to the Church's school.
Nove is teaching her physical fighting techniques.
Oh?
We've decided on your dorms.
Ah, there you are, Touma, Lily.

It's dangerous for you two to be seperated after all,
so we've put you in the same room for now.
We've given you a curtain in the double room... so please stay together for now.
I don't mind
EHHHHHHH
I'm fine with it too...
That's what we intended.
AL-RIGHT!
Since its your job to respond first when something happens to the Eclipse and Divider.
OH! THEN COUNT ME IN TOO!
MAKE IT A TRIPLE ROOM, WHILE WE'RE AT IT!
SEEMS LIKE THINGS ARE GOING TO BE HARD FOR YOU.
Well, it's not that bad if I think of it as an extention to our camp trip...

Well, two's company, three's a crowd, right?
Make sure you get along!
OKAY!
OH, RIGHT! SU-CHAN, TIA!
I haven't been able to say it properly.
I'm sorry for causing you to worry so much.
I'm sure things will only get more complicated from now on,
but my travels have ended for the time being.
I won't wander off, and will be trying my best not to worry you.

So...
I'm home, Su-chan, Tia.

Okay ...
Welcome back, Touma.

I thought it'd be more like a slave or prisoner's room, but it's all normal!

Erio, Caro?!
Touma! Long time no see!
You've grown since I last saw you~
Insane growth?
Yeah, long time no see!
No No, that's what I should be saying!
Good day.
Excuse us~!
The same, Caro Lu Luche.
And I guess its "Nice to meet you" to you two ladies.
I'm Erio Mondial, colleagues of Subaru and Tiana.

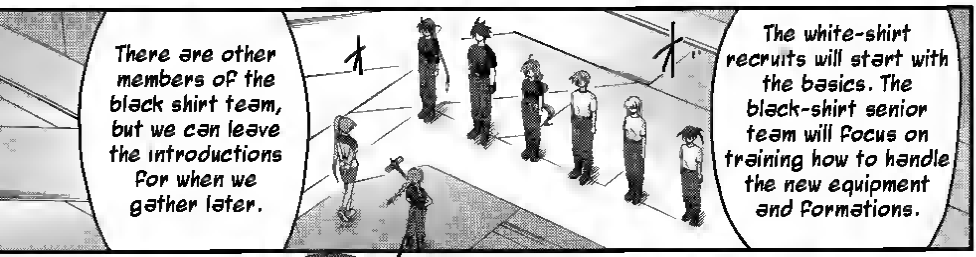
Let us get changed quickly and join them!
Ahh, yes!

Let me introduce myself again. Captain Takamachi Nanoha, combat instructor of the SSG.
The same, Lt. Vita.



There are other members of the black shirt team, but we can leave the introductions for when we gather later.
The white-shirt recruits will start with the basics. The black-shirt senior team will focus on training how to handle the new equipment and formations.

If that works, then that'll be great...
I'll surprise them!
Haha, I have confidence in my stamina and physical shape.

Roger!
Swordfish 1, you take the lead.
Let's begin with some simple workouts. Do a round of the training drill!

Don't say you're going to be of use to our officers, recruits.
Just start by making sure you and your friends survive.
Don't get in the way of our Forwards.

After all, it's a dangerous disease that could turn the current magic age on its heels.
They - the Huckebein, can somehow suppress their murderous impulses, but cannot survive if their desire for destruction isn't fulfilled.
We can predict the actions of the infected patients from the data we have obtained.

The desires are parallel to that of drowning beings wanting to breathe.
The impulses of murder and destruction torments the patient.
Basically, they cannot get by without destroying or killing.
Putting it extremely, they're carnivores that cannot get by without devouring others.
